Block 1: Hero

Main Headline (H1): From Low-Ticket Payments to Merchant Financial Visibility

Subheadline: Many Micro-SME merchants process high-frequency, low-ticket transactions that stay invisible to the formal financial system — MCBuse turns that activity into structured financial data.

Action Buttons: [Join the Pilot] [Watch Demo]

Safety Line: Currently in MVP and pilot preparation stage. Regulated payment and financial services are handled by licensed partners.

Visual Space Placeholder: Mobile App Mockup — QR payment trigger animation & clean data analytics cards flowing. *(Strictly NO coin/crypto graphics)*

Block 2: The Problem

Headline: Why MCBuse Exists: The Low-Ticket Data Gap

Description: High-frequency, low-ticket transactions remain poorly structured or invisible to the formal financial system — creating a severe data gap that hurts both micro-merchants and the institutions that might serve them.

Diagram Placeholder: "Invisible Cash Cycle vs. Structured Infrastructure" comparison diagram

Pain Point Cards:

- **Card 1 — Low-Ticket Payment Friction:** Traditional POS systems are expensive and complex for low-value transactions.

- **Card 2 — Weak Merchant Records:** Cash-heavy operations make tracking historical performance difficult.
 - **Card 3 — Payout Uncertainty:** Merchants may lack clear visibility into expected, completed, delayed, or missing payouts.
 - **Card 4 — Limited Business Visibility:** Without simple analytics, merchants can't see daily totals, sales rhythm, or basket-size patterns.
 - **Card 5 — Low Financial-Service Readiness:** Even active merchants may remain hard for banks to understand because their activity isn't structured into usable data.
-

Block 3: The Solution

Headline: Payment Data Becomes Merchant Intelligence

Description: MCBuse captures QR/NFC payment events and converts them into structured merchant records. These records power business analytics, credit-readiness indicators, and future matching preparation with banks and financial institutions.

Block 4: Value & Benefits Snapshot

Headline: Built for Micro-Retail Operational Growth

Value Summary:

- **Payment Capture:** Zero-friction QR/NFC event capture for micro-tickets (EUR 0.10–10.00).
- **Business Analytics:** Daily sales rhythm & real-time payout clarity.
- **Credit-Readiness:** Internal data consistency & early readiness indicators.
- **Institutional Matching:** Structured business profiles prepared for partner review.
